Australian Government Rebate on private health insurance

Private Health Insurance Statement 1 July 2016 to 30 June 2017

The table below provides details of your 2016/17 private health insurance policy. Each adult beneficiary on the policy will receive their own statement showing their share of the policy only.

The Australian Government determines the way the rebate is calculated and applied to premiums. Rebate percentages are adjusted on 1 April each year. If you paid premiums for your policy before and on or after 1 April, the table below will contain at least two lines of information. Where more than one line of information has been provided, the information from each line must be entered separately at the corresponding labels on the income tax return at **Private health insurance policy details**.

You will need to nominate a tax claim code when completing the Private health insurance policy details section of your tax return. Read the tax return instructions to determine the tax claim code appropriate for your situation.
